EDUCATION

WEILL CORNELL MEDICINE | M.S., Biostatistics and Data Science

New York, NY

- · Academic Excellence (Over 4.0 cumulative GPA) Award
- · Thesis: Application of a Bayesian Model Averaging Method to Observational Metabolomics Data Analysis

DUKE UNIVERSITY | *M.S.*, Business Analytics

Durham, NC

· Capstone project: Duke University Hospital (Duke Health)

SUNGKYUNKWAN UNIVERSITY | B.B.A. with an emphasis on Quantitative Methods

Seoul, Korea

- · Dean's list with distinction
- · Study-abroad: School of Arts and Sciences at the University of Pennsylvania (2014) Travel funding, Mar 2015
- · Military Service: Republic of Korea Marine Corps (Rank: Sergeant, 2011 2013)

TECHNICAL SKILLS

- · **Programming:** R, Python
- · Database: MySQL, SQL Server, Microsoft Access
- · Cloud/Distributed computing: Amazon Web Services
- · Visualization: Tableau, Power BI, Prism Graphpad
- · **Deployment:** Shiny App
- · Version control: Git

RESEARCH EXPERIENCE

COLD SPRING HARBOR LABORATORY | Biostatistician

Cold Spring Harbor, NY

· Provide weekly office hours for researchers in need of statistical help or consultation

Sep 2020 – Present

- Collaborate with Cancer Center and Northwell Health investigators on pre-clinical/clinical study and complex statistical modeling and machine learning algorithms applications (power calculations, data integration, normalization, outlier detection, hypothesis testing, regression, classification, clustering)
- Write and review statistical analysis plan (SAP) and methodology sections of research proposals, grant applications, and manuscripts
- · Develop tools and pipelines to efficiently collect, clean, and prepare massive volumes of data for statistical modeling
- Transform formulated problems into implementation plans for experiments by applying appropriate methods, algorithms, and tools, and statistically validating the results against biases and errors
- Interpret the results and develop insights into formulated problems within the biomedical research context and provide the guidance on risks and limitations

WEILL CORNELL MEDICINE | Research Assistant – Biostatistics & Data Science (Advisor: Xi Kathy Zhou, PhD) **Application:** Collaboration with Andrew J. Dannenberg, MD group

New York, NY Apr 2019 – Sep 2020

- Collaborated extensively with investigators researching cancer, obesity, and metabolic diseases
- · Provided statistical consulting support to clinical (lab) and genomic data using R
- · Performed sample size and power calculations, designed and implemented database for clinical data collection
- · Interpreted statistical analysis reports for investigators and wrote statistical method sections for scientific publication

Methodology: Application of Bayesian model averaging to better identify differentially expressed genes in high-dimensional setting

- · Developed a new statistical method using Bayesian model averaging to identify DE genes associated with one or more patient characteristics (or phenotypes), as well as their interactions
- · Built and improved R package 'BMAseq' using Bayesian model averaging to analyze observational gene-expression data
- · Applied the Bayesian model averaging method to multiple types of datasets, from metabolomics data to NGS data, to check its performance

JOHNS HOPKINS UNIVERSITY | Voluntary Researcher – Bioinformatics Analyst (Advisor: Bongsoo Park, PhD) Transcriptome and epigenome atlas for air pollution PM_{2.5} Apr 2019 – Apr 2021

- · Generated a pipeline code to analyze liver single-cell RNA-seq data using R package Monocle to cluster the cells and predict cell types
- · Constructed analytical pipelines using R and Python to identify DE genes associated with the exposure to particulate matter
- · Checked sample quality by Spearman's Rho correlation, hierarchical clustering, and perform Principal Component Analysis (PCA)
- · Performed Differential Expression analysis and Gene Ontology (GO) Term analysis on six different brain sub-areas and liver cells
- · Conducted pathway analysis using Ingenuity Pathway Analysis (IPA) software
- · Prepared tables and figures and wrote statistical methods sections for scientific publications

TEACHING EXPERIENCE

Big Data in Medicine: Biomedical Imaging Teaching Associate for Prof. Elizabeth Sweeney, Weill Cornell Medicine	Spring 2020
Big Data in Medicine: Genetics & Genomics Teaching Associate for Prof. Davide Risso, Weill Cornell Medicine	Spring 2020
Categorical and Censored Data Analysis Teaching Associate for Prof. Oleksandr Savenkov, Weill Cornell Medicine	Fall 2019

- · Led lab sessions for 32 Master's candidate students to teach biostatistical methods with R
- · Reviewed and graded weekly homework and provide guidance on lab assignments
- · Held regular office hours regarding questions on course materials, assignments, and academic concerns

PRESENTATION & PRESS INTERVIEW

· Virtual Core Knowledge: Biostatistics Workshop, Cold Spring Harbor Laboratory	Jan 2021
· Interview Article: Analysis of 3,600 COVID-19 sequences on Nextstrain, <i>Donga Science</i>	<i>Apr</i> 28 th , 2020
· The Single-cell Pathology Landscape of Breast Cancer, Weill Cornell Medicine	Mar 2020
· Genomic Signatures Predict the Immunogenicity of BRCA-Deficient Breast Cancer, Weill Cornell Medicine	Dec 2019
· Profound Perturbation of the Metabolome in Obesity Is Associated with Health Risk, Weill Cornell Medicine	Aug 2019

SERVICES

Voluntary Data Science Instructor

Nov 2021 - Current

· Instruct students who are interested in learning statistics and machine learning algorithms on weekend (Statistics, Regression, Machine Learning, and SQL)

Nextstrain | Voluntary Technical Translator

Mar 2020 – *May* 2020

Translated technical document and weekly genomic analysis of COVID-19 situation reports into Korean
